FIELD REPORTS

USER MANUAL

For employees, supervisors and administrators

KINGDOMS TOUCH SERVICES

kingdom-touch.vercel.app | Version 2.4 - 2026

SECTION 1

WELCOME

Field Reports is the Kingdoms Touch Services app for documenting field work: every job is recorded with photos, GPS location and notes, and a supervisor reviews and approves it. It works on your phone like an app and even without signal: whatever you capture is saved and sent automatically when the connection returns.

Install the app on your phone

- 1 Open **kingdom-touch.vercel.app** in your phone's browser.
- 2 **Android (Chrome)**: tap the "Install app" button on the sign-in screen and confirm.
- 3 **iPhone (Safari)**: tap **Share** (square with arrow), then **"Add to Home Screen"**.
- 4 The app stays on your home screen with the crown icon.

Language

The app is available in English and Spanish. It detects your phone's language automatically and you can change it in Profile > Language.

SECTION 2

HOW TO SIGN IN

Field employees (PIN)

- 1 The first time, type your **first and last name** and tap "Continue".
- 2 Enter your **4-digit PIN** (your supervisor or admin gives it to you).
- 3 The device remembers you: next time only your name appears and you just type the PIN. If it's not your phone, tap "Not you?".

Supervisors and administrators (email)

- 1 On the sign-in screen, tap "Staff sign in".
- 2 Enter your **email and password** and tap "Sign in".

Security

After 3 wrong attempts the account is locked for security. Ask your administrator to unlock it or assign you a new PIN from “Manage team”.

EMPLOYEE

SECTION 3

FOR EMPLOYEES

Create and submit a report

- 1 On Home, tap “**New Report**”.
- 2 Type the **job type** (e.g. lawn mowing) and the customer's **location**.
- 3 The **GPS** is captured automatically — allow location access if asked.
- 4 Take **photos** of the finished work with the in-app camera.
- 5 Add notes if needed, review the summary, check “**Work completed**” and tap **Submit**.

If changes are requested

- 1 You'll get a **notification** (bell) with the reason your supervisor wrote.
- 2 Open the report and tap “**Edit and resubmit**”.
- 3 Fix what's needed and resubmit. This repeats until the report is **approved**.

No signal

No internet at the job site? Create the report anyway: it stays saved on your phone (“Awaiting sync”) and is sent automatically when the connection returns.

SUPERVISOR

SECTION 4

FOR SUPERVISORS

Review and approve reports

- 1 Sign in with your email: you'll see the **team dashboard** with recent reports and today's stats.

- 2 Tap a report to open it: photos (tap to enlarge), verified GPS, description and notes.
- 3 **Approve:** if everything looks good, tap “Approve”. The employee gets notified.
- 4 **Request changes:** tap “Request changes”, write the reason (what's missing or needs fixing) and send. The employee sees it and resubmits.
- 5 **PDF:** export any report to PDF with the download button (great for the customer).

Notifications

The bell on the dashboard shows a counter when new or resubmitted reports arrive. Tap it to see the list and open each one.

ADMIN

SECTION 5

FOR ADMINISTRATORS

Admins can do everything a supervisor does, plus manage the team from **Profile > Manage team**.

Add a team member

- 1 Type the **first and last name**.
- 2 Choose the **role**: employee or supervisor (the super admin can also create admins).
- 3 Choose the access: **4-digit PIN** (field employees) or **email and password** (staff).
- 4 Tap “**Create member**” and hand the PIN or password to the person.

Reset, unlock and deactivate

- **Reset:** assign a new PIN or password if someone forgot it (it also unlocks).
- **Unlock:** release an account locked by failed attempts.
- **Deactivate:** remove access for someone who no longer works at the company (their history is kept).
- PINs can't be shared between active employees: if the system rejects one, pick another.

SECTION 6

FAQ

**I forgot my PIN or password**

Ask your admin to reset it from Manage team. You'll get a new one instantly.

My account is locked

It happens after 3 failed attempts. Your admin can unlock it instantly from Manage team.

I have no signal on site

Create the report as usual: it's saved on the phone and sent automatically when you're back online.

How do I change the language?

Profile > Language: English or Spanish. Report PDFs also come out in the chosen language.

Do my photos use a lot of data?

Photos are compressed automatically before upload to save data.

SECTION 7

TROUBLESHOOTING

GPS isn't captured

Allow location access and retry from the report. iPhone: Settings > Privacy & Security > Location Services > Safari (or the app). Android: Settings > Apps > Chrome > Permissions > Location.

The camera won't open

It's the Camera permission: enable it in your phone settings (same path as GPS). You can also upload photos from your gallery with the left button.

My report says "Awaiting sync"

There was no connection when you sent it. It's saved on your phone: open the app when you have signal or WiFi and it sends itself.

I see "Couldn't load. Check your connection"

Tap "Retry". If it persists, check your signal or WiFi. Your data is not lost.

The app doesn't show the latest changes

Fully close the app and reopen it (up to twice). Updates install automatically on relaunch.

It says "Report not found"

That report belongs to another account or was deleted. Make sure you signed in with your own account.

**(Admins) “PIN already in use” when creating a member**

That PIN is already used by another active employee: pick a different one. And if a staff member forgot their password, use “Reset” in Manage team.

Support

Something not working as expected? Contact your administrator or the Onserk team that delivered the application.
